For one of our clients we are looking at the locations Klagenfurt, Vienna, Graz, Karlsruhe, Cologne or remote in Austria or Germany or nearby as soon as possible in permanent employment several

(Senior) Software Engineers ? Cloud Services - GO Developer (m/f/d)

Die Tätigkeitsinhalte

You bring passion and enthusiasm for innovative technology and cloud services. You are committed, like to work independently and have a high quality awareness. Then this is the right position for you at our client, because here you will actively shape the company's own services and be part of the development of new features and technologies that offer our customers real added value. As (Senior) Software Engineer - Cloud Services - Go Development, your focus will be on the development and provision of secure and highly available services in the company's own cloud ecosystem. You will play a key role in the Kubernetes infrastructure, write the k8s operators on which the service is based and support the further development of our client's Terraform plugins. Another focus of your work is the support and further development of the virtualization middleware, which forms the link between the enterprise engine and the virtualization infrastructure. You will be responsible for the software that enables the provisioning of VMs at more than 90 PoPs. This includes the provisioning of virtual consoles via WebSockets or the distribution of operating system images to the PoPs. Our client works in a distributed and agile way, relies on self-responsibility and ensures the quality of the services through sophisticated CI pipelines, automated testing and peer reviews. Through your input, your ideas and approaches to solve complex challenges efficiently and cleanly, you contribute to the joint success and the challenging and diverse tasks.

Ihre Qualifikation

You have successfully completed a technical education and/or have already gained relevant professional experience. You are characterized by an independent and reliable way of working, furthermore you are very customer- and service-oriented and attach importance to a high quality of your results. Furthermore, you bring the following knowledge and qualifications with you:

- Expert knowledge in the area of Go (lang)
- Experience with Linux, as well as understanding of the interaction of network, operating system and software
- Routine in dealing with relational databases (MySQL, MSSQL, PostgreSQL, ...)
- Ideally knowledge in handling automation tools (Ansible)
- Systematic and analytical thinking as well as high motivation to learn new technologies
- Very good knowledge of English, knowledge of German is an advantage but not necessary

Das Unternehmen

Our client offers high-quality solutions in the area of cloud hosting, as well as individual software and app development. The owner-managed company, founded in 2006 and based in Klagenfurt, Austria, Germany and New York City, serves numerous international customers. Here you can expect more than just a job, because despite the rapid growth of the company, you can count on a family-like corporate culture in which everyone stands up for the other and which is characterised by respectful interaction with each other. In addition to the usual benefits, you will be offered flexible working hours, a mentoring programme and continuous training and development.
